

Hello,

©

Please feel free to forward this attachment or full email to any and all homeowners, HOA's, property managers, and commercial property owners seeking professional landscape services. Attached is a copy of Florida Landscape Professional's latest nursery availability.

We have Mini Pine Bark mulch available at a cost of \$40 per cubic yard installed with a 5.5 cubic yard minimum. Large volume discounts available.

Clean-up's and tree work/ palm trimming, all vary in pricing. The more we can do at one location/neighborhood the cheaper it will be. For example: if we can get 5-10 homes in one neighborhood to clean-up rather than just one.

Most all 4" annuals are \$1.67 each installed with a 120 plant Minimum. Large volume discounts available.

We will discount irrigation work only if we have more than one home in the same neighborhood to perform repairs at. Please call with ANY questions.

Tree pricing varies extremely, so if someone wants ANYTHING in particular just have them call. We have thousands of trees, and of course we still have plenty of beautiful Roebellinii and Queen palms their just not mentioned on the attachment. All the trees are amazing you should see the Magnolia's, their especially beautiful.

For your information, we also offer brick paver installation (patios, pathways, driveway replacement, etc... extremely affordable and much cheaper then pouring concrete.) As well as L.E.D landscape lighting (80 percent more efficient the halogen landscape lighting systems, including a 15 year free bulb replacement warranty.)

Our company most recently added a virtual design software to the list of services we provide. This software allows our design staff the ability to landscape from a photo and or plot plan. We can show the

client an actual photo of their property fully re-landscaped before they buy anything at all. We can add features like brick pavers pathways or driveways, lighting accents, even water features as well.

We are confident that with our attention to the best in quality, as well as a professional and knowledgeable installation staff, combined with a great reputation in the green industry, will provide for years of enjoyment and return on investment for anyone needing our services.

Sincerely,

Vinnie Ragone
